John and Matt,

Below is a list of prices and services for the Gin Mill's new website. Here are the two options that I came up with, we can negotiate something else I'm super flexible. Thanks for the opportunity to do this for you guys.

## Option 1:

• Custom built site using Bootstrap	\$500
• 4 months of site updates	\$0
• Original Photography by me	\$0
• Adding SEO for more web traffic (6+months)	\$0
• Hosting setup through GoDaddy	\$0
• Web mail through GoDaddy and Microsoft	\$0
• Updates to site monthly-bi-monthly/weekly	<u>\$50/\$75 per month</u>
Total:	\$900/\$1100 for the year

## Option 2:

• Templated site and customization	\$800
• 4 months of site updates	\$0
• Original Photography by me	\$0
• Adding SEO for more web traffic (6+months)	\$0
• Hosting setup through GoDaddy	\$0
• Web mail through GoDaddy and Microsoft	\$0
• Updates to site monthly-bi-monthly/weekly	<u>\$50/\$75 per month</u>
Total:	\$1200/\$1400 for the year

I think the second option is the way to go. These sites are very advanced and mobily optimized and on par with the local competition. You're essentially getting a \$10,000 dollar website for a fraction of the cost. It will take me a day or so to figure out the template but it's well worth the investment. The templates run about \$75 dollars. I can have all of this up and going in about two weeks. I also will add menu to the site when the time comes. Let me know what you think and lets get together so I can show you the site I mocked up.

Thanks,

Matt
